Section II. Background Information on the Issuer's Financial and Economic Position

2.1. The Issuer's Financial and Economic Performance Data

Behaviour of the Issuer's financial and economic performance indicators calculated on the basis of the data from accounting (financial) statements

Standard (rules) for preparing the accounting (financial) statements used to calculate the indicators: **RAS**

Unit of measurement used to calculate labour productivity: **RUB/pers.**

Indicator	6M 2017	6M 2018
Labour productivity	9,036,835	9,131,512
Debt-to-equity ratio	0.2	0.15
Ratio of long-term debt to the total of long-term debt and equity	0.05	0.04
Debt coverage by current income (profit)	1.26	0.93
Overdue debt, %:	0	0

Analysis of the Issuer's financial and business operations based on the economic analysis of behaviour for the indicators above:

Over 6M 2018, labour productivity gained 1% as compared to the same period of 2017 due to higher sales revenue. Higher revenue was primarily due to increase of payments under capacity supply agreements (CSA) due to revision of prices for Surgutskaya GRES-2 starting from Q2 2017.

Debt coverage by current income (profit) reflects the adequacy of funds (profit from operating activities) to pay the debt (liabilities and interest payable in the reporting period).

Improvements in this indicator for 6M 2018 as compared to the same period of 2017 were due to lower taxes and levies payable, particularly in terms of the income tax. As of 30 June 2017, the profit tax payable was incurred due to the insurance benefit received by the Company as compensation for the accident at Berezovskaya GRES Power Unit No. 3 in H1 2017 as the Company has an obligation to make advance payments under the profit tax. Thus, as early as in Q3 2017, the Company paid an extra profit tax to be put by the Company on the account of future tax payments in 2018.

At the end of 6M 2018, the Issuer's financial position is stable and the Company is characterised by high paying capacity.

2.2. The Issuer's Market Capitalisation

Market capitalisation is calculated as the product of the number of shares of the relevant class (type) by the market price of one share disclosed by the trade organiser

Unit of measurement: **RUB**

Indicator	As of 31 December 2017	As of 30 June 2018
Market capitalisation	161,089,444,200.48	182,589,052,995.92

Information on the securities trade organiser whose data are used to calculate market capitalisation, as well as other additional information on public trading of securities to be provided at the Issuer's discretion:

Trade organiser: *Moscow Exchange PJSC*

Number of outstanding shares: **63,048,706,145 shares**

2.4. Risks Associated with Purchases of Securities Being Placed (Placed)

The Issuer's Risk Management Policy:

The Issuer's investments in securities are associated with a certain level of risk. Therefore, potential investors should review the following factors thoroughly before making any investment decision. Any of these factors may have an adverse impact on the Issuer's financial standing.

This list of risks is not exhaustive and only reflects the Issuer's opinion and its own assessments. As of the date of this Report, certain risks that the Issuer was unaware of or failed to assess correctly may exist.

Risk management is a task of current relevance for the Issuer. The Issuer seeks to manage risks effectively, thus ensuring stability of its financial situation, supporting its business development strategy and implementing its mission.

The risk management system is an integral part of the Issuer's production and resolution making processes. It consists of a number of components included in the Issuer's management structure and integrated in its production processes.

The key elements of the risk management system are as follows: the Issuer's strategy, internal regulations, reporting system, controlling and planning processes, internal control system and internal audit, regular reporting on risks and opportunities, as well as the availability and operation of the Issuer's Regulatory Commission and the Risk and Finance Committee.

The risk management system is intended to identify and assess risks, develop countermeasures on a timely basis, monitor and report on the risks.

This Section only describes the risks the Issuer considers material. There may exist certain other risks that are not covered in this Section. The other risks that the Issuer is unaware of or considers negligible at this stage may potentially have an adverse impact on the Issuer's business.

2.4.1. Industry Specific Risks

Risk of changes in the rules of the wholesale electricity and capacity market

The Russian regulators have a great influence on the outcomes of the electric power and capacity market operations. Increase in the share of the regulated component in the wholesale market has an adverse effect on the Issuer's yield as it reduces the share of more efficient sales at non-regulated (free) prices.

The regulator sets regulated prices of electric power and capacity (about 20% of the total sales revenue of generators) and determines the share of electric power and capacity to be supplied at regulated prices. Furthermore, the regulator is able to influence pricing in the free market directly or by regulating gas prices.

Actions taken by the Issuer to reduce this risk:

- Contributing to the efforts of NP Council of Power Producers Association and the committees of Association NP Market Council in order to protect the interests of generation companies in case of any changes in the Wholesale Market Rules.

Commodity/market risks

Capacity sales are rather over-regulated in the existing model of the wholesale market: the Federal Antimonopoly Service sets regulated capacity tariffs and tariffs for 'forced' generators; the Government of the Russian Federation has approved the price formula for newly built units and sets price parameters for competitive capacity auctions following which capacity prices are determined for all other generators.

The main sector exposed to the commodity/market risk is the day-ahead market (DAM), where pricing is based on an arm's length principle. Due to significant excess capacities formed in the market as a result of stagnation of power consumption and ongoing commissioning of capacities by generators under investment programmes, the competition between generators and pressure on the free price are increasing.

Actions taken by the Issuer to reduce this risk:

The Company uses all the methods allowed by the Wholesale Market Rules to increase its revenues from electric power sales in the free sector of the market.

Environmental risks

The Issuer's operations are associated with some risks in the areas of public health, industrial and environmental safety intrinsic to the electric power industry. The Issuer bears, and will bear, significant operating and capital expenses to ensure its compliance with the Russian laws and government regulations in the field of environmental protection, public health, and industrial safety.

After Federal Law No. 219-FZ "On Amending Federal Law "On Protection of the Environment" and Certain Legislative Acts of the Russian Federation dated 21 July 2014 came in force, the approaches to setting the rates (limits) of permissible adverse impact based on the Best Available Techniques (BAT) have been harmonised with the European Union law and adjusted for Class I facilities producing the worst environmental impact in the Russian Federation. BAT include state-of-the-art equipment and technologies that have a minimum adverse environmental footprint and yet are affordable for businesses. Upon transition to technology-based rate setting for large businesses, the financial burden will increase due to the required transition to BAT or application of considerable multiplying factors (25- and 100-fold) when adverse impact reduction measures are not implemented.

Following state registration in 2016, certain Company branches (Berezovskaya GRES and Surgutskaya GRES-2, 800 MW power units, and Smolenskaya GRES) have been classified as Class I facilities. These branches were also put on the list of 300 facilities (Order of the Ministry of Natural Resources and Environment of the Russian Federation No. 154 dated 18 April 2018) that will have to obtain a Complex Ecological Permit (CEP) in pilot mode starting from 01 January 2019 till 31 December 2022. In the meantime, a set of preparatory steps shall be taken in order to secure the CEP over the course of the two preceding years (2017–2018).

After reviewing Information and Technical Reference Book No. 38 *Fuel Combustion by Large Plants to Generate Power* that was approved and published in late 2017 and represents the key document regulating heat power facilities pursuant to BAT principles, we may state that the risk of failure of Unipro's facilities (including those that are not included in Class I facilities) to comply with the technological standards is low.

Actions taken by the Issuer to reduce this risk:

- In order to ensure high-level readiness to comply with the legal requirements, in 2017, Berezovskaya GRES branch arranged a business game to get practical training in the procedure of obtaining the CEP involving the officials of the regulatory agencies (Rosprirodnadzor (Russian Federal Service for Supervision of Natural Resources), Rospotrebnadzor (Russian Federal Service for Surveillance on Consumer Rights Protection and Human Wellbeing), MinPrirody (Ministry of Natural Resources and Environment of the Russian Federation), etc.) and under the guidance of the organisers from among the representatives of the BAT Bureau regulating the transition to BAT-based rate setting. Following the game, some recommendations were developed to optimise the procedure for issuing the CEP and to reduce administrative barriers and risks for businesses,

- Contributing to public discussions (including through NP CPP) of the amendments to the regulatory legal acts so as to adjust the criteria and reduce the number of the Company's facilities that fall within Class I facilities subject to hard rate setting by demonstrating the lack of social and economic rationale;

- Changing the Class of Smolenskaya GRES branch (down to Class 2) based on the utilisation of single capacity (similar to Shaturskaya GRES and Yaivinskaya GRES branches),

- Implementing and updating environmental performance enhancement programmes developed for the Company's branches in 2016, including the funding of activities intended to reduce the volume of emissions,

pollutant discharge and waste dumping so as to minimise the period of excess-of-limit payments (with 25-fold fines) for any failure to meet the BAT parameters,

- Maintaining and ensuring ongoing improvement of the environmental management system (recertified in 2016) in line with ISO 14001:2015,
- Managing environmental risks, identifying significant risks and aspects, developing and maintaining procedures to manage such risks and aspects;
- Implementing and updating the environmental risk management programme;
- Implementing the environmental policy and the environmental performance enhancement programme, including the funding of activities intended to reduce pollutant emissions / discharges and waste dumping based on the procedure for managing operations that determine the Company's approach to the management of significant environmental aspects of its activities,
- Improving personnel's competence, awareness, and culture in the field of environmental protection, public health, and industrial safety using all available modern methods and technologies;
- Ensuring ongoing provision of all stakeholders with the information on the actions taken by the Issuer to improve the environmental situation in the regions of Issuer's presence.

Risks of increase in prices of fuel and its supply (gas)

The fuel prices have a material impact on the Issuer's financial performance. Energy products are supplied under long-term agreements of the Issuer concluded with independent gas suppliers. Some long-term gas supply agreements provide for the recalculation of prices in case of excessive or insufficient purchases of gas.

The Issuer's consumption of gas depends on the utilisation of its power plants by the System Operator, and the Issuer is unable to forecast its gas consumption volume precisely. The recalculation of gas prices in case of excessive offtake or failure to take gas on the part of the Issuer may have an adverse effect on its financial performance.

Actions taken by the Issuer to reduce these risks:

- The existing agreements have minimised these risks significantly.

Risks associated with the Issuer's dependence on coal supplies to Berezovskaya GRES.

Having the second largest installed capacity among the Issuer's power plants, Berezovskaya GRES is designed to use the only type of fuel, that is 2-BR lignite coal from the Kansk-Achinsk coal basin. No other type of coal from any other coal basins can be fired without modifying the equipment. However, it is possible to use up to 30% of 3-BR coal that has a greater caloric content if compared with 2-BR coal.

The coal is supplied to Berezovskaya GRES by conveyer transport from Berezovsky-1 open-pit mine owned by JSC SUEK that dominates the 2-BR lignite coal market in the Krasnoyarsk Territory.

In case of any interruption or suspension of coal supply for a long period of time, Berezovskaya GRES may stop generating power until the coal supply is resumed, which, in its turn, may have a considerable adverse impact on the Issuer's financial performance.

Actions taken by the Issuer to reduce this risk:

- Creating coal stockpiles to be used in case of any interruptions in coal supply to the power plant.

2.4.2. Country and Region Specific Risks

Political risks

The Issuer's activities are exposed to risks associated with geopolitical tension, political turmoil in the relevant country, possible conflicts among federal, regional and local government bodies due to different controversial issues, including taxes, municipalism and allocation of responsibility among government regulatory agencies.

Any significant disagreements related to future reform areas, deterioration of the geopolitical situation, tougher sanctions of the European Union and the USA, political turmoil or conflicts among powerful economic groups may have an adverse impact on the Issuer's activities, its financial performance and development prospects as well as on the cost of investments in Russia and the prices of the Issuer's shares.

Tax risks

The tax system efficiency is affected by an excessive number of tax control activities, staff shortage in tax agencies and complexity of the Russian tax laws.

All these factors make it impossible to forecast the outcome of tax control activities and reduce the efficiency of further remedies available to taxpayers. Furthermore, when defending its tax interests in court, the Issuer cannot be guaranteed that its tax case will be considered impartially, for various reasons, including the political ones.

The Issuer examines carefully all amendments to the tax legislation and judicial precedents in tax case hearings in order to take such amendments into account with respect to its own tax obligations without delay.

Territory specific risks

The Issuer's performance depends greatly on the location of the Company's generators. Given the oversupply in the wholesale electricity and capacity market, prices in day-ahead markets can be very low, almost down to zero

at certain hours. The key factor influencing the utilisation and price in the day-ahead market for Berezovskaya GRES is water content in Siberian rivers.

2.4.3. Financial Risks

Credit risks

The credit risk is becoming one of the most significant financial risks due to deterioration of counterparties' financial position.

Actions taken by the Issuer to reduce any adverse impact of credit risks on its activities:

- Selecting reliable counterparties;
- Incorporating the requirement for external (bank) guarantees in agreements with counterparties, wherever possible;
- Assigning credit ratings to counterparties and setting limits for transactions therewith based on the rating;
- Diversifying suppliers,
- Limiting advance payments.

Risk of counterparties' (power consumers') insolvency

The Issuer has hardly any instruments to make its buyers pay for the electric power supplied. If a counterparty is unable to pay or delays any payment for the electric power supplied, the Issuer cannot terminate the agreement concluded in the wholesale electric power and capacity market and stop supplying electric power unilaterally.

The majority of the Issuer's counterparties under regulated bilateral contracts are regional energy retail companies that do not consume electricity but resell it to end consumers and, therefore, depend on the ability or willingness of the end consumers to pay for the electric power they receive.

The Issuer is not sure whether the entire volume of electric power supplied by regional retail companies will be paid for by end consumers and whether regional retail companies will be able to discharge their obligations in full in accordance with the provisions of the contracts. In fact, regional retail companies operating in Dagestan, Chechnya, North Ossetia-Alania, Ingushetia and being the Issuer's counterparties often fail to pay for electric power supplies. Failures to pay or delays in payment for the electric power and capacity supplies may affect the Issuer's revenues and performance.

Thus, the 'assignment' of insolvent consumers may jeopardise the Issuer's financial position even if its total sales remain the same.

The Issuer is going to scale up its activities and enter into free bilateral contracts with reliable counterparties.

Risks of foreign exchange rate fluctuations

The Issuer carries out its business operations in such a way that its fixed assets and covered liabilities are denominated in the national currency; therefore, foreign exchange rate fluctuations are not producing any significant impact on its activities.

During the implementation of its investment programme, the Issuer entered into construction agreements for new generating capacities. Commissioning of its new generating capacities gives rise to the Issuer's foreign exchange liabilities under long-term equipment maintenance agreements. Significant fluctuations of foreign exchange rates might affect the real value of the Issuer's liabilities under the long-term maintenance agreements and affect its financial performance.

Actions taken by the Issuer to reduce any adverse impact of foreign exchange rate fluctuations:

- Hedging foreign exchange risks associated with the Issuer's foreign exchange liabilities under the maintenance agreements.

Risks of inflation

The Issuer's financial and business operations may be affected by the following inflation risks:

- Risk of decrease in the actual value of receivables in case of any significant deferment of or delay in payment;
- Risk of increase in the cost of goods, products, works, services due to a rise in prices of energy products, transportation expenses, salaries, etc.

With account of the above, the Issuer takes a lot of effort to monitor inflation rates.

2.4.4. Legal Risks

One of the risk groups having a material effect on the activities of Unipro PJSC are legal risks, i.e. the risks of adverse effects for the Issuer as a result of any misuse or misunderstanding of legal rules when making or implementing any managerial decisions and carrying out its activities, or due to a major change in any legal rules at the moment of performance of a transaction or managerial action versus the period when the transaction was agreed upon or the managerial decision was made. Generally, such risks are borne by the majority of businesses operating in Russia and affect the Issuer's activities to the same extent as those of any other players in the wholesale electricity market. Since the Issuer does not operate in foreign markets, the Issuer's legal risks are only described with regard to its domestic market.

The Issuer's core business activity covers generation and sales of electric and heat power, thus legal risks related to the regulation of this area may have a significant impact on the Issuer's situation.

The list of industry specific regulatory legal acts that are of great importance for regulating the Issuer's activities is specified below:

- Federal Law No. 35-FZ "On Electric Power Industry" dated 26 March 2003;
- Federal Law No. 190-FZ "On Heat Supply" dated 27 July 2010,
- Decree of the Government of the Russian Federation No. 1172 "On Approval of the Rules for Wholesale Market of Electricity and Capacity and on Amending Certain Acts of the Government of the Russian Federation Regarding Regulation" dated 27 December 2010,
- Decree of the Government of the Russian Federation No. 238 "On Determining Pricing Parameters for Capacity Trade in the Wholesale Electricity and Capacity Market" dated 13 April 2010,
- Decree of the Government of the Russian Federation No. 1178 "On Pricing in Regulated Prices (Tariffs) Sector of Electric Power Industry" dated 29 December 2011,
- Decree of the Government of the Russian Federation No. 1075 "On Pricing in Heat Supply" dated 22 October 2012.

The enforcement of the said laws and regulations is aimed at deregulating the electricity and capacity market, transitioning to market pricing of electric power and capacity, creating a legal framework for deregulated electricity and capacity market operations, developing a competitive environment in the sector of electric and heat power generation and sales, creating mechanisms of flexible and balanced tariff regulation that would ensure the availability of the Issuer's products and services for consumers, as well as a reasonable level of revenue from its activities and return on its investments.

Another important aspect for the Issuer's activities is self-regulation exercised through Association NP Market Council and its activities related to setting detailed rules for operations in the electricity and capacity market, approving regulations and standard contracts regulating such activities.

Taking into account that the government regulation in Russia tends to change frequently and fast, it cannot be guaranteed that the government would not cancel market deregulation and transition to the free market or would suspend reforms of the heat power market, or change – in any way that would be unfavourable for generation companies – its approaches to such reforms, retreat from the balanced approach to various types of tariff regulation in the industry, which, in its turn, may have an adverse impact on the Issuer's activities and present a material legal risk associated with the Issuer's core business activity.

Risks of changes in foreign exchange regulation

The Issuer monitors any changes in foreign exchange regulation in the areas related to its operations (purchase, sales of foreign currency, financial transactions with Russian and foreign currencies) in order to avoid any illegal business activity. The Issuer considers the risk of changes in foreign exchange regulation to be insignificant as the Russian government authorities confirm, again and again, their commitment to the principles of free floating of capital, including its trans-border movement. However, the currency legislation in the Russian Federation contains some wording that is not clear or precise enough, which may, due to divergent approaches to interpretation, result in claims from regulatory authorities with respect to some foreign exchange transactions of the Issuer. To minimise this risk, the Issuer studies the applicable rules of the foreign exchange legislation thoughtfully and in detail prior to making any foreign exchange transaction and consults foreign exchange control agents when required.

Risks of changes in tax legislation

The Issuer monitors any changes in the tax legislation on a regular basis and assesses the degree of potential impact of such changes on its operations.

The tax legislation of the Russian Federation is subject to frequent changes, while the approaches to its interpretation and application are rather ambiguous and often revised by regulators and courts. Another adverse circumstance is that such changes in the approaches to interpretation and application of taxation rules are often applied retrospectively affecting the taxpayer's tax liabilities for tax periods preceding the development of those approaches. Such instability in the field of tax regulation gives rise to additional risks for the Issuer's activities, which may be associated with incorrect assessment by the Issuer of its tax liabilities and the resulting problems it may face during tax control activities carried out by the relevant tax authorities. The Issuer uses its best efforts to keep records of its tax liabilities in strict compliance with the applicable tax legislation of the Russian Federation as well as to defend its rights and legal interests when tax control measures are applied thereto.

Risks of changes in customs regulations and duties

The Issuer carefully monitors any changes in customs regulations and duties in the areas of its activities (import of goods into the Russian Federation for the construction of new generating capacities or as materials and technical resources) so as to avoid any illegal business activity. The Issuer considers risks of changes in customs regulations and duties to be insignificant.

Risks of changes in requirements related to licensing the Issuer's core business activity or licensing the right to use items of limited transferability (including natural resources)

The Issuer carefully monitors any changes in licensing requirements in its core business areas in order to avoid carrying out any unlicensed operations.

In case of any major changes in the requirements for licensing the Issuer's core business activity or licensing the right to use items of limited transferability, the Issuer will take necessary measures to obtain relevant licenses and permits in a timely manner and to minimise legal risks in this field.

Risks of changes in judicial practice in matters related to the Issuer's business activity, which may affect its performance and outcomes of court proceedings involving the Issuer

The independence of the Russian judicial system and the reliability of mechanisms protecting it against any economic, political and social impact have not been tested enough in practice yet.

The judicial system suffers from scarcity of competent staff and underfunding as well as an excessive number of court cases pending. Enforcement of judgments may prove problematic in practice. Frequent reforms to the organisation of courts and amendments to the procedural legislation, including the matters of competence of the court and its jurisdiction over a case, together with changes in approaches applied by courts to any particular category of cases, bring even more uncertainty to the judicial system operations. The said factors make it impossible to predict the outcome of court proceedings in Russia and guarantee the efficiency of remedies. Moreover, sometimes claims may be brought to courts or administrative authorities, or a prosecution may be initiated for some political, competitive, administrative or other reasons rather than on legal grounds. Such actions can also be initiated against the Issuer with no guarantee of impartial trial.

The Issuer, carefully and regularly, studies changes in judicial practice related to its activities so as to ensure their timely consideration and take them into account in any current proceedings where it is involved. The judicial practice is analysed at the level of both the Supreme Court of the Russian Federation and commercial courts; the Issuer also examines the legal position of the Constitutional Court of the Russian Federation on certain law enforcement matters.

In addition to changes in the existing judicial practice related to the Issuer's activities that may have a negative effect on its performance, the Issuer may also get involved in judicial proceedings that may potentially give rise to a new judicial practice unfavourable for the Issuer (e.g. attempts may be made to use the fact that the equipment has been under emergency repairs for a long time as a pretext for terminating a capacity supply agreement by court order).

2.4.5. Reputational Risk

Loss of reputation causes damages resulting from a decrease in the number of clients (counterparties) due to the formation of unfavourable opinion on the Issuer's financial position, quality of its products (works, services) or the nature of its business in general.

The Issuer's core business is participation in the wholesale electricity and capacity market where electricity consumers in most market sectors are not free to refuse to purchase electricity and capacity from Unipro PJSC at their own discretion.

Nevertheless, the Issuer's activities are exposed to risks associated with the decrease in the number of non-regulated bilateral contracts with reliable counterparties as well as the decrease in the number of suppliers of products (works, services) due to the formation of unfavourable opinion on the Issuer's paying capacity, financial standing or the nature of its business in general.

The Issuer strives to maintain and protect the Company's business reputation. The measures aimed at protecting the Company's reputation include the existing risk management and internal control systems, internal regulations and policies intended to monitor and ensure the compliance of the Company's activities with the applicable laws, internal rules and regulations, as well as measures aimed at ensuring a stable financial position of the Issuer.

2.4.6. Strategic Risk

The Company's strategic risk is the risk of loss of its competitive edge or profits, or the risk of damages incurred due to any mistakes committed in making strategic decisions that determine the Company's development area and/or in implementing such strategic decisions, including the provision of resources to support the strategy. Such risks manifest themselves as ill-founded identification of promising areas, inadequate assessment of hazards, insufficient provision of required (material, organisational, human) resources to support the strategy implementation.

The methods applied by the Company to manage strategic risks are as follows: the business planning system, the system of responsibility allocation and delegation in the decision-making process, the internal audit and risk management systems, as well as the personnel incentive programme based on KPI achievement.

2.4.7. Risks Associated with the Issuer's Activities

Risks associated with the current court proceedings involving the Issuer

In Q2 2018, the Issuer was not involved in any judicial proceedings that, according to the Issuer's management bodies, could have a material adverse impact on its financial and business operations. In this context, the Issuer's

management considers the impact on its financial and business operations to be significant if claims made against the Issuer in such judicial proceedings exceed 0.5% of the book value of its assets, or if non-property claims that may restrict the Issuer's core business activity significantly are brought against the Issuer. Currently, the Issuer is not involved in any judicial proceedings falling under the materiality criteria mentioned above, and does not anticipate any involvement in such proceedings in the near future. The Issuer's legal functions are taking all reasonable steps to mitigate legal risks associated with judicial proceedings and protection of the Issuer's rights and legitimate interests.

Risks of failure to extend any business license held by the Issuer or its licenses to use items of limited transferability (including natural resources)

The Issuer's core business activity is not subject to licensing. However, the Issuer holds a number of licenses to carry out some of its activities. The Issuer complies with the requirements of the licensing legislation in full and in a timely manner and, therefore, the risk of failure to extend any current special permits (licenses) is assessed by the Issuer as low.

Risks of the Issuer's potential liability for third-party debts, including debts of the Issuer's subsidiaries

In Q2 2018, the Issuer did not have any effective liability agreements for the debts of any third parties (including its subsidiaries); the Issuer did not give any letters of comfort or independent guarantees for such debts.

Risks of potential loss of consumers accounting for at least 10% of the total revenue from sales of products (works, services) of the Issuer

The bulk of the Issuer's sales revenue results from its operations in the wholesale electric power (capacity) market. Subject to the Wholesale Market Rules, consumers of electric power and capacity in all sectors (except for free contracts) are assigned to the Issuer, or the electric power is supplied to them under the scheme of "impersonal" commission trade through Centre of Financial Settlements Joint Stock Company, a universal commission agent, and, as a result, buyers of electric power and capacity cannot refuse, at their own discretion, to purchase electric power and capacity from the Issuer. However, the Issuer strives to optimise its business operations, reduce its costs and increase the marketability of its generating assets in pursuit of most attractive buyers in the wholesale electric power market because the key competitive factor in the market, when selling a standardised product, is its price.

Business interruption risks

This risk is caused by any factors that can lead to business interruption. Meanwhile, this risk includes both a direct stoppage in production resulting from physical damage of the equipment, and a consequential business interruption resulting from material loss at an outside facility that does not belong to the Issuer, and is not maintained or managed thereby.

The main factors when assessing the possible losses include turbine oil catching fire, damage of the turbine wheelspace, explosion of the boiler at ignition, explosion in the chemical water treatment ammonia storage, washout of the water gathering pond dam, etc.

The measures taken by the Company to reduce the probability of any adverse effects of such negative event are as follows:

- Establishing a four-tier system of industrial control and industrial safety management;
- Carrying out equipment maintenance in line with a strict schedule;
- Ensuring high-quality training of the personnel (especially the employees operating hazardous industrial facilities), assessment of their knowledge and analysis of their reliability based on investigations of incidents and near misses;
- Ensuring systematic work with the personnel to increase their reliability manifesting itself in the absence or minimisation of consequences of any accidents/incidents resulting from human errors;
- Implementing a risk-oriented approach to the planning of targeted measures aimed at improving equipment reliability as part of repair and modernisation operations;
- Implementing the recommendations of the risk engineers from insurance companies that are based on the best practices in improving the reliability and fire safety of equipment, buildings and structures;
- Ensuring thorough supervision over the maintenance personnel in terms of their strict compliance with the procedures for the maintenance and technical acceptance of repaired equipment by the customer's representatives;
- Using the system of regular equipment performance assessment;
- Involving specialised contractors to assist with technical condition diagnostics and assessment;
- Conducting on-site inspections to assess equipment maintenance readiness and assess the completed repairs;
- Investigating all instances of equipment failure affecting the operation of generating equipment;
- Calculating and analysing the reliability indicators for the equipment groups to forecast its forced unavailability and ensure that investments are used to minimise such forced unavailability;

- Analysing changes in the equipment performance indicators and cost/performance ratios;
- Implementing a comprehensive programme of equipment replacement and unit-by-unit reconditioning;
- Implementing a comprehensive advanced training programme for production personnel;
- Standardising repairs, including by developing maintenance data sheets and maintenance workflow specifications;
- Providing employees with incentives intended to reduce the equipment damage rate and forced unavailability (including targeted reduction of the bonus rate depending on the contribution of specific employees to the forced unavailability value);
- Insuring business interruptions and property damage.

Risks associated with Berezovskaya GRES Power Unit No. 3 recovery

On 1 February 2016, a fire broke out in the boiler house of Power Unit 3 at Berezovskaya GRES that damaged the boiler. Power Unit No. 3 of Berezovskaya GRES is currently under repair. The Power Unit is scheduled to be commissioned in Q3 2019. There is a risk that the actual date of completion of emergency repairs at Berezovskaya GRES Power Unit No. 3 and the total costs of recovery may differ from the scheduled date and budgeted costs. The factors of this risk include unscheduled works (design and planning flaws, remedial works, accidents, injuries, etc.), and delays by contractors.

The Issuer gives maximum attention to the management of this risk by monitoring the repair process closely.

Section III. Detailed Information on the Issuer

3.1.3. Information on the Issuer's Incorporation and Development

The Issuer has been incorporated for an indefinite period.

Brief overview of the Issuer's incorporation and development Issuer's objectives, Issuer's mission (if any), and any other information concerning the Issuer's operations that may materially affect the decision to purchase the Issuer's securities:

The Issuer was incorporated under the resolution of the Sole Founder – RAO UES of Russia, Russian Open Joint Stock Power and Electrification Company, Order No. 34r dated 02 March 2005 in accordance with the resolution of the Board of Directors of RAO UES of Russia OJSC (Minutes No. 181 dated 26 November 2004), resolutions of the Management Board of RAO UES of Russia OJSC (Minutes No. 1138pr/2 dated 24 January 2005 and Minutes No. 1149pr/3 dated 08 February 2005) and Order of the Government of the Russian Federation No. 1254-r dated 01 September 2003.

In the period from 01 September 2005 to 01 July 2006, OGK-4 OJSC performed the duties of the Sole Executive

Body of Surgutskaya GRES-2 OJSC, BGRES-1 OJSC, Shaturskaya GRES-5 OJSC, Smolenskaya GRES OJSC, and Yaivinskaya GRES OJSC.

On 01 July 2006, these companies were reorganised through consolidation with OGK-4 OJSC and starting from Q3 2006, the Issuer is conducting operations as a single production company.

Following an additional issue of shares in September–October 2007 combined with concurrent sale of the government-controlled portion of the Issuer's shares held by RAO UES of Russia OJSC, E.ON Russia Power GmbH (a subsidiary of Germany's E.ON. Group engaged in power engineering) became the majority shareholder of OGK-4 OJSC.

On 01 July 2008, OGK-4 Holding OJSC spun off from RAO UES of Russia OJSC through reorganisation concurrently consolidated with OGK-4 OJSC. As a result, the former shareholders of RAO UES of Russia OJSC turned into direct shareholders of OGK-4 OJSC.

On 08 July 2011, the updated version of the Articles of Association was registered according to the resolution of the Annual General Meeting of Shareholders that changed the name from OGK-4 OJSC to E.ON Russia JSC.

At present, the majority shareholder of the Company is Uniper SE. Uniper SE was created through the splitting of E.ON Group: E.ON focuses on renewable energy sources, distribution networks, and customer solutions; Uniper is engaged in traditional generation, global power market transactions, and upstream operations.

On 23 June 2016, the updated version of the Articles of Association was registered under the resolution of the Annual General Meeting of Shareholders that changed the name of the Company from E.ON Russia JSC to Unipro PJSC.

3.2.2. The Issuer's Core Business Activity

Business activities (types of activities, types of products (works, services)) accounting for at least 10 per cent of sales (proceeds) of the Issuer in the reporting period

Unit of measurement: **RUB mln**

Business activity type: **generation and sales of electric power**

Indicator	6M 2017	6M 2018
Sales revenue (sales volume) for this type of business activity, RUB mln	37,856	38,299
Share of sales revenue (sales volume) for this type of business activity in the Issuer's total sales revenue (sales volume) (%)	97.58	97.43

Changes in the Issuer's sales revenue (sales volume) from the core business activity of 10 per cent and more as compared to the same reporting period last year and reasons for such changes

Higher indicators in the reporting period are due to growing income from capacity sales under CSA for Surgutskaya GRES-2 CCGT power units as compared to the same period of 2017. Meanwhile, electric power sales revenue in H1 of the current year declined as compared to the same period of 2017 due to declining output caused by a higher downtime of generating equipment in cold reserve in accordance with the System Operator's scheduling and general inspection of CCGT Power Unit No. 7 at Surgutskaya GRES-2.

The Issuer's core business activity is seasonal in nature as demand for electric and heat power is subject to major fluctuations depending on the season. Specifically, electric power supply in Q1 and Q4 accounts for about 55% of annual sales. This is due both to shorter daylight hours in winter and to the fact that most repair works (and therefore, take-down of power generation systems for repairs) fall within the summer months. Furthermore, changes in weather conditions may affect the utilisation of generating equipment by the System Operator, as it is the equipment of hydro power plants that is predominantly used in high water periods resulting in lower utilisation rates of thermal power plants, which in turn results in a lower output of electric power by the Company's power plants.

Heat power generation is subject to even higher seasonal fluctuations: in Q1 and Q4 (winter months), the volume of heat power supplied from the headers accounts for about 75% of annual volume, as the heat power generated by the Issuer's power plants is primarily used to heat living quarters and industrial facilities. Therefore, in summer, demand for heat goes down considerably due to higher ambient temperatures resulting in a lower output of this product.

3.2.4. Sales Markets for the Issuer’s Products (Works, Services)

Core markets where the Issuer operates:

The Issuer is one of the wholesale generation companies that supply electric power to Siberia and the European part of Russia.

Registered as an independent player in the wholesale market, Unipro PJSC sells electric power in the wholesale electric power and capacity market through its five Branches: Smolenskaya GRES, Shaturskaya GRES, Surgutskaya GRES-2, Yaivinskaya GRES and Berezovskaya GRES.

It sells electric power in two price zones and in all sectors of the wholesale market: under regulated contracts, under capacity supply agreements in a forced mode, in the day-ahead market, and in the balancing market.

Supplies under regulated contracts in the wholesale electricity market (WEM) were carried out according to the maximum tariffs approved for Unipro PJSC power plants by Order No. 1721/17 of the Russian Federal Antimonopoly Service dated 18 December 2017 for H1 2018:

Branch name	Tariff set	
	Electric power RUB/MW·h	Capacity RUB/MW per month
Surgutskaya GRES-2	725.58	96,994.97
Surgutskaya GRES-2, CSA facility	530.16 530.32	-

Berezovskaya GRES (TG-1)	354.0	176,213.63
Berezovskaya GRES (TG-2)	322.09	173,660.21
Shaturskaya GRES	1,515.98	151,513.27
Shaturskaya GRES, CSA facility	766.94	-
Smolenskaya GRES	1,285.53	110,651.27
Yaivinskaya GRES, Units 1–4	1,050.70	164,811.88
Yaivinskaya GRES, CSA facility	631.93	-

The electric power was sold in competitive sectors of the market at prices established as a result of daily trading sessions.

All power plants of the Issuer participated in tenders in competitive sectors of the wholesale market, which enables the Issuer to gain additional benefits in the day-ahead market (DAM) both from selling and buying electric power.

Sales of electric power in the day-ahead market in Q2 2018 amounted to 8,007 mln kWh and purchase thereof – to 650 mln kWh. 316 mln kWh was sold and a deficit of 528 mln kWh was made up for in the balancing market.

The table below shows the results of the comparative study of electric power sales by Unipro PJSC branches in the wholesale market in Q2 2017–2018.

Branch name	Electric power sales (GWh)		
	Q2 2017	Q2 2018	Difference, %
Surgutskaya GRES-2	7,567	6,829	-10
Berezovskaya GRES	1,530	1,236	-19
Shaturskaya GRES	696	1,164	+67
Smolenskaya GRES	459	392	-15
Yaivinskaya GRES	1,286	1,222	-5
Total	11,538	10,843	-6

The decrease in electric power sales in Q2 2018 vs Q2 2017 was mainly due to changes in the plant mix and maintenance schedule.

In contrast to electricity, heat power is sold in the local retail heat markets.

The key consumers of heat power produced by the Branches of Unipro PJSC are housing companies and organisations and social facilities in Ozerny Settlement (Smolensk Region), Shatura, Surgut, Yaiva Settlement, Sharypovo (including Dubinino Settlement and Kholmogorskoye Settlement). In addition, Shaturskaya GRES branch supplies heat power to a couple of industrial consumers in its region.

Given that no new facilities or large residential districts are built, the range of heat power consumers remains almost the same.

Heat sales as a share of the Issuer's total sales in the quarter accounted for about 1.4%. However, taking into account the social focus of heat supply services for residential buildings and social facilities, the Issuer makes the effort to ensure the quality and reliability of heat power supply to solvent consumers and make its supplies loss-free.

The table below shows the results of the comparative study of heat power sales by Unipro PJSC branches in Q2 2017–2018.

Branch name	Heat power supply to consumers, thousand Gcal		
	Q2 2017	Q2 2018	Difference, %
Surgutskaya GRES-2	153	185	21
Berezovskaya GRES	90	97	8
Shaturskaya GRES	35	44	26
Smolenskaya GRES	6	5	-17
Yaivinskaya GRES	14	11	-21

Total	298	342	15
-------	-----	-----	----

Total net supply of heat power to consumers by Unipro PJSC amounted to 342 thous. Gcal in Q2 2018, i.e., 15% more as compared to the same period of 2017. The key reasons for variations in heat supply to consumers among the branches are weather conditions, extension of the heating season, sales of heat directly from ShaGRES header (avoiding the grid), which made it possible to rule out any loss.

Factors that may have an adverse impact on the Issuer's sales of its products (works, service) and actions the Issuer may take to reduce such impact:

The key factor that may affect the Issuer's product sales is increased competition in the electric power market as well as potential non-payment for electric and heat power supplies and unprofitability of tariffs set by regulators. To improve its competitiveness, the Issuer is going to increase capacity sales under free contracts, optimise its sales, commercial dispatching and costs of electricity supplies, control the costs of heat generation, transmission, and sales, reconstruct the existing and build new generating facilities, and carry out the technical refurbishment of its fixed assets.

Section IV. Information on the Issuer's Financial and Business Operations

4.1. Results of the Issuer's Financial and Business Operations

Behaviour of the Issuer's financial and business performance indicators including profits and losses calculated on the basis of the data from accounting (financial) statements

Standard (rules) for preparing the accounting (financial) statements used to calculate the indicators: **RAS**

Unit of Measurement for total uncovered loss: **RUB mln**

Indicator	6M 2017	6M 2018
Net profit margin, %	54.55	26.39
Asset turnover ratio, times	0.28	0.28
Return on assets, %	15.02	7.29
Return on equity, %	17.97	8.42
Total uncovered loss as of the reporting date	0	0
Ratio of uncovered loss as of the reporting date to book value (%)	0	0

All indicators have been calculated using the recommended calculation practices.

Economic analysis of the Issuer's profits / losses based on the behaviour of the indicators provided above that have caused the Issuer's profits / losses as reflected in the accounting (financial) statements according to the management bodies:

High figures for the rate of return and net profit margin (%) in 2017 were due to the insurance benefit of 20 bln roubles received by Unipro PJSC in May 2017 as compensation for the accident at Berezovskaya GRES Power Unit No. 3.

The Issuer made profit during the period under review. The Issuer's operational excellence is attested to by high rates of return that are among the best in the industry. The Issuer has no uncovered losses.

The Issuer's management bodies diverged as to the causes and their effect on the Issuer's financial and business operations: **No**

A member of the Issuer's Board of Directors (Supervisory Board) or member of the Collective Executive Body has a dissenting opinion as to the causes and/or their effect on the Issuer's financial and business operations mentioned above, which opinion is reflected in the minutes of the meeting of the Issuer's Board of Directors (Supervisory Board) or of the Collective Executive Body that considered the relevant items, and insists that such opinion be reflected in the quarterly report: **No**

4.2. The Issuer's Liquidity, Capital and Current Assets Adequacy

Behaviour of the Issuer's liquidity indicators calculated on the basis of the data from accounting (financial) statements

Standard (rules) for preparing the accounting (financial) statements used to calculate the indicators: **RAS**

Unit of Measurement for Net current capital: **RUB mln**

Indicator	6M 2017	6M 2018
Net current capital	32,935	24,453
Current liquidity ratio	2.88	2.84
Quick liquidity ratio	2.26	1.7

The Issuer may at its own discretion provide the behaviour of the Issuer's liquidity indicators calculated on the basis of the data from the Issuer's consolidated accounting (consolidated financial) statements to be included in the quarterly report: **No**

All indicators have been calculated using the recommended calculation practices: **Yes**

Economic analysis of the Issuer's liquidity and paying capacity, Issuer's capital adequacy to satisfy short-term liabilities and cover current operating expenses based on the economic behaviour analysis for the indicators mentioned above including a description of the factors that had the most significant effect on the Issuer's liquidity and paying capacity according to the Issuer's management bodies:

The amount of the net current capital characterises the balance of the Issuer's equity after the Issuer covers its short-term liabilities. The Issuer fully covers its current liabilities by own funds.

Liquidity indicators are within an optimum range during the reporting periods.

Decline in the Net Current Capital in H1 2018 as compared to H1 2017 was due to decrease in the current assets following payment of dividends for 2016 and interim dividends for 9M 2017, as well as due to the decrease of receivables under the advance payments made under overhaul repair and restoration works.

The Issuer's liquidity and paying capacity indicators attest to the Issuer's current capital adequacy.

The Issuer's management bodies diverged as to the causes and their effect on the Issuer's financial and business operations: **No**

A member of the Issuer's Board of Directors (Supervisory Board) or member of the Collective Executive Body has a dissenting opinion as to the causes and/or their effect on the Issuer's financial and business operations mentioned above, which opinion is reflected in the minutes of the meeting of the Issuer's Board of Directors (Supervisory Board) or of the Collective Executive Body that considered the relevant items, and insists that such opinion be reflected in the quarterly report: **No**
